Objective

Motivated and detail-oriented B. Pharmacy graduate with a strong academic foundation and a passion for pharmaceutical sciences. Eager to begin a career in a reputable organization where I can apply my knowledge, contribute to healthcare advancements, and grow professionally. Dedicated to lifelong learning and committed to maintaining high standards in all tasks.

Education

- **Vikas Mandir Secondary School** 2018
  SSC
  87.20%
- **R. K. Talreja College of Arts Science and Commerce** 2020
  HSC
  78.47%
- **Gahlot institute of pharmacy (University of Mumbai)** 2021-2025
  Bachelor in Pharmacy (B.Pharm)
  Avg. CGPA :- 6.92

Skills

- Quality assurance and quality control
- Clinical research and methodologies
- Stability testing of drugs
- Microbial testing
- Regulatory affairs
- Drug formulation and development
- Familiar with GMP guidelines

Interpersonal Skills

-
  - Situation handling
  - Attention to details
  - Adaptability
  - Punctual with teamwork and collaboration

Experience

- **Dortmund Laboratories Pvt. Ltd. Dombivali** 01.06.2024 - 01.07.2024
  Summer Internship (one month)
  - Assisted in manufacturing operations involving tablets, capsules, and liquid dosage forms.
  - Gained exposure to GMP practices, BMR documentation, and SOP compliance.
  - Observed quality control testing and basic analytical procedures.
- **Gahlot Institute of Pharmacy Student Council comitee** August 2023 - May 2024
  Chief Discipline Secretary
  - Developed and implemented strategies to ensure adherence to campus regulations.

- Mediated student disputes and communicated disciplinary guidelines.
- Assisted in organizing and managing campus events, ensuring smooth execution and student compliance.

Projects

- **Solubility Enhancement of Ibuprofen by Solid Dispersion**
  This study focused on improving the water solubility of Ibuprofen, a commonly used pain reliever and anti-pyretic drug. Despite its effectiveness, Ibuprofen has low water solubility, which can limit how well it works in the body. To address this we used a technique called solid dispersion, where the drug is combined with carriers to enhance its solubility. Various carriers, including polyethylene glycol(PEG), Polyvinylpyrrolidone(PVP) and mannitol were used in different proportions, and the mixtures were using solvent evaporation method.

- **Review Article of Solubility Enhancement of telmisartan by using Supercritical Anti-solvent**
  This study aimed to enhance the solubility of telmisartan, a poorly water-soluble BCS class || antihypertensive drug, using the solid dispersion technique, solid dispersion were prepared with poloxamer 407, polyethylene glycol 600, mannitol, arginine, sodium starch glycolate and methanol in different ratios via the solvent evaporation method. The formulation were analyzed using an optical microscope, FTIR, DCS, In vitro dissolution studies, drug content estimation, and saturation solubility analysis, the results demonstrated improved solubility and dissolution of telmisartan, highlighting the effectiveness of solid dispersion in enhancing its bioavailability.

Certifications And Workshop

- AI for Healthcare – Value Added Course, Gahlot Institute of Pharmacy (July 2024)

Achievements & Awards

- Represented college in various inter-college competitions (Painting, Singing, Acts, Poetry), winning several competitions and demonstrated leadership, social, artistry and a strong competitive spirit.

Personal Information

- Date of Birth : 23rd November 2002
- Languages : English, Hindi and Marathi
- Nationality : Indian
- Gender : Male

Interests : Writing(script), Singing, Painting, Poetry

Declaration

- I hereby declare that the above-mentioned information is correct up to my knowledge and I Bear the responsibility for the correctness of the above-mentioned particulars.

Date: -

Yours faithfully,

Place: - Mumbai
